Summer 2018

FedEx addition in Edwardsville, Kansas

FedEx Freight Expands Its Kansas Facility

Fifth facility Olaf Anderson has built for FedEx

April 2018 marked the start of Olaf Anderson's fifth facility for FedEx Freight. The expansion is located in Edwardsville, Kansas, and at the estimated November 2018 completion date, it will be the largest facility in the FedEx Freight system with a total of 750 active trucks.

The project scope includes remodeling 16,000 square feet of office space, construction of an F5 rated tornado shelter, approximately 70,000 square feet of warehouse expansion, 11

acres of new paving and a new underground fueling station.

Olaf Anderson Construction first worked for FedEx back in 1999 when we constructed a new cross dock facility. Since then, we have completed several projects for both the FedEx Freight and FedEx Air Cargo divisions. The locations of these projects include several in Fargo N.D., one in Minot N.D., and now Edwardsville, Kansas.
