

PROJECT PROFILE

RDO Equipment Co. on Highway 10 in Hawley, Minnesota.

RDO Equipment Co.

RDO Hawley had been operating out of a 40-year-old building with multiple additions, and as the company grew, so did the need for a new facility. Olaf Anderson Construction filled that need by constructing a new store on the high-profile Highway 10 in Hawley, Minnesota.

The 40,000-square-foot office, showroom and shop allowed RDO to better meet their customer's needs.

The most significant feature in the new facility is the doors. More than 20 overhead doors allow drive-thru bays for efficient traffic flow.

RDO Equipment Co. owns and operates more than 60 equipment dealerships in nine states. The company sells and services John Deere, Vermeer and Topcon brands in the agriculture and construction markets.

Project Facts

- 40,000-square-foot office, showroom and shop
- 11-month completion
- Design-build project delivery
- Pre-engineered and conventional framing

A close-up focusing on a few of the building's features: EIFS (exterior insulation finishing system), sunshades and windows.
